I have a couple of goals for mid-to-late summer this year. One is to get up to the higher mountain elevations to see the montane wildflower displays that start showing July through August. It has been a few years since I made this trek, and I realize it is something I don't want to miss yet again. I have memories of hiking the trail at Iron Mountain with hillside rock gardens ablaze with Indian paintbrush interspersed with bright yellow stonecrop. There are also high meadows where the array of blooming flowers changes weekly as the progression of flax, penstemon, yarrow, saxifrage, lupine, larkspur, beargrass, and others creates a stunning palette of colors. Trails at Mount Hood, Jefferson Park, and the Three Sisters areas can be bountiful with flowers, but also mosquitos. Male Rufous Hummingbirds will move up to higher elevations where these flowers provide food for them as they begin their southward migration by first flying up to the mountains for this feast of flowers. Other birds to look for are Mountain Bluebirds, Hermit Warblers, Gray Jays, Mountain Chickadee, Sooty Grouse, and Ruffed Grouse.

A second goal for this summer is to visit the coast in August to see migrating shorebirds. This southern migration occurs over a relatively long period of time, through October, with the adult males generally moving through first, then females,

(continued on page 6)

Forage Fish Threatened

Debbie Schlenoff

541.685.0610

dschlenoff@msn.com

Most fisheries management is concerned with large commercially fished species such as salmon and tuna. It is uncommon for smaller species such as anchovies to be discussed, except perhaps when choosing toppings for pizza. Yet forage fish such as anchovies, sardines, and smelt play a crucial role in the marine ecosystem. They form the essential link between smaller plankton and larger fish such as tuna and salmon, as well as whales and other sea mammals, and many species of seabirds. It is critical that fisheries management councils turn their attention to the management of smaller forage fish. Large quantities of forage fish are being taken to provide feed for livestock and poultry or to be turned into fertilizers and pet food. Given the rapid expansion of the aquaculture industry, there is a huge increase in the use of forage fish to feed farmed fish. A recent report by the Lenfest Forage Fish Task Force (PEW Charitable Trust) found current management to be insufficient to sustain forage fish populations given this escalating demand. They also noted that, based on their ecosystem role, forage fish are economically worth more in the ocean than they are worth harvested.

A review this spring in the scientific journal *Bird Conservation International* revealed that seabirds are the most threatened group of birds, with the status of most seabird populations continuing to show rapid declines. Past studies have shown a correlation between forage fish abundance and seabird breeding success. In a long-term study recently published in *Science*, researchers collected data on 14 seabird species including gulls, terns, puffins, penguins, and murre. They found that if forage fish abundance fell below one third of the maximum biomass ever recorded, the seabirds were less successful at raising young. As long as the amount of forage fish in the sea was greater than this threshold, the number of chicks produced was unchanged by fluctuations in food availability. The “one-third for the birds” rule-of-thumb may prove useful in the development of management plans.

The Pacific Fishery Management Council will meet early this summer and have a chance to consider this issue. Many Oregon Audubon chapters have joined together to encourage the council to protect forage fish species and the marine ecosystem they sustain. Lane Audubon signed on to a letter requesting that the council prevent the development of any new fisheries for forage fish and refrain from expanding any existing forage-fish fisheries until the science is in place for effective ecosystem-wide management of these species.

The letter also expressed concerns about management of the ESA (Endangered Species Act) listed eulachon, a species of smelt (also called hooligan and candlefish). They are a favorite prey of many animals including the endangered Marbled Murrelet. Endemic to the eastern Pacific Ocean, ranging from northern California to southwest Alaska, eulachon populations have declined dramatically, with a 98% reduction in catch after 1993 compared to previous years. Among the suggestions was a call for identification and designation of all eulachon key habitats, time-sensitive area closures, support of by-catch reduction measures and a monitoring system to enforce them, and the implementation of an effective cap on the amount of allowable by-catch of eulachon.

Many species and an entire ecosystem stand to benefit from careful consideration of healthy, sustainable forage fish populations. We hope that the Pacific Fishery Management Council focuses on conservation and recovery for these fish.

Farewell, Welcome, and a Call for New AITS Instructors

Kris Kirkeby

541.349.2439

k2kirk@comcast.net

I will be stepping down from coordinating the Audubon in the Schools (AITS) program at the end of June. After twenty years of teaching an art and biology curriculum, it comes with a bit of sadness but also pride that so many children have learned to observe our natural world and its creatures in special ways. At the end of spring term the AITS program has reached more than 9,600 students since its start in the spring of 2005!

I'm also very proud to announce that one of our current instructors, Barclay Browne, has agreed to take on the role of coordinator. She has been a very dedicated instructor and has a great passion for education. Barclay comes to us with a PhD in molecular biology from the University of Alabama at Birmingham.

We finished our spring term with our roster of instructors down in numbers, so we very much need to recruit and train new people to join us for the fall term. You can help by contacting friends you think would have fun volunteering as an AITS instructor.

AITS combines biology and art lessons for children in grades 2-5. We currently offer lessons on bird skeletons, bird feathers, bird nests, birds and their ecosystems, bird flight and skeletal function, and Go Birding, a unit on beginning bird identification.

You don't have to be a bird biologist or an artist to teach this curriculum. We need volunteers who love birds and enjoy teaching young children. Barclay will arrange for free training sessions in late July or August.

How much time will it involve? The training involves two full Saturdays. Our aim is to have a large enough pool of instructors, so volunteers need commit to only one visit per month. Each instructional visit lasts one hour, plus time to pick up and return the teaching collection.

If you're interested in training to teach in the AITS program, please call or e-mail Barclay Browne soon: 541-338-4643, barclay.browne@gmail.com.

Audubon in the Schools instructors visited Edgewood Community Elementary School nine times in April and May. We presented bird lessons to the second grade classes taught by Mitzi Shirk, Janet Watson and Debi Newberry. Here is one student's response:

Dear Kris, I had so much fun with you. I do hope we will see you again.

PS I learned that bird wings have thumbs.

PPS Birds are so cool.

PPPS Bird feathers are so soft.

PPPPS When I was little I thought birds were animals that fly.

PPPPPS I did not know that bird bones were hollow.

Field Notes: April-May 2012

- Lazuli Bunting
- Forster's Tern

- Murphy's Petrel
- Blue Jay

Tom and Allison Mickel

tamickel@rioussa.com

The weather was a little more normal this spring, with rain for most of April but mostly dry during May. The spring migrants seemed to arrive a little later than normal overall, especially flycatchers. There are a number of great bird sightings for the county in this report period, including a first Oregon record if it's accepted by the Oregon Bird Records Committee (OBRC)!

Abbreviations: Fern Ridge Reservoir (FRR), North Jetty of the Siuslaw River (NJSR), South Jetty of the Siuslaw River (SJSR)

WATERBIRDS

Greater White-fronted Goose (300)	April 22	Deadwood	KB	A normal time for their migration.
Greater White-fronted Goose (1225)	April 28	Eugene area	MN	Flocks flying overhead.
Tundra Swan	April 1	Eugene airport	MN	Last report for the winter.
Blue-winged Teal	April 13	Washburne Lane	AP,BH	A couple weeks earlier than normal.
Redhead	April 1	FRR	MN	First report for the summer.
Black Scoter (40)	April 6	Tokatee Klootchman	DP	An unusually large number for the county.
Black Scoter (21)	April 6	NJSR	DP	Obviously the height of migration.
Long-tailed Duck	May 13	SJSR	NS	Last report for the winter.
Horned Grebe	April 8	FRR	RR	Found the last few years at this time of year.
Northern Fulmar	April 6	NJSR	DP	Migrating to the breeding grounds.
Murphy's Petrel	April 17	cruise ship off coast	JW,et al.	Rare for ocean off Lane Co.
Cook's Petrel	April 17	cruise ship off coast	JW,et al.	Very rare for ocean off Lane Co.
Sooty Shearwater (2)	April 6	NJSR	DP	Migrating to the breeding grounds.
American White Pelican	May 20	Oakridge area	JW,et al.	Rare away from FRR.
White-faced Ibis (15)	May 15	FRR – Royal Ave	RR	Rare, but almost annual at this location.

GROUSE to GOATSUCKERS

Ruffed Grouse (drumming)	April 8	Veneta area	RR	Found in the same area the last few years.
Bald Eagle (nest w/3 young)	April 13	Skinner Butte	TMe	Largest number of nestlings to date.
Golden Eagle	April 8	Washburne Lane	SK	Uncommon in the valley.
Peregrine Falcon	April 30	Skinner Butte	RR	Local breeder?
Sora	April 5	FRR	RR	A normal time for their spring arrival.
Black-necked Stilt	April 9	FRR – Fisher Butte	SM	A few days earlier than normal.
Black-necked Stilt (2)	April 13	Alvadore Rd	AP,BH	Last report for the spring.
American Avocet (2)	May 15	FRR	RR	Rare, but almost annual – mostly spring.
Wandering Tattler (2)	April 29	NJSR	DP	Normal migration time and location.
Western Sandpiper (600)	April 21	Baker Beach	DF	A good day for migrant shorebirds.
Wilson's Phalarope (4)	May 13	FRR	NS	About a week later than normal.

Red-necked Phalarope	May 1	FRR	JC	A normal migration time.
Caspian Tern	April 12	Florence area	DF	A normal time for their migration.
Black Tern	April 28	FRR	fide JC	Almost a week earlier than normal.
Forster's Tern	May 12	FRR	MS,RR	Rare during migration and breeding season.
Marbled Murrelet (14)	April 6	Tokatee Klootchman	DP	An unusually large number for the county.
Rhinoceros Auklet (15)	April 29	NJSR	DP	Normally a good location after breeding.
Short-eared Owl (2)	April 5	Meadowlark Prairie	JD	Wintering birds still being seen.
Common Nighthawk	May 30	River Rd area	TMe,MRu	A few days earlier than normal.

PIGEONS to JAYS

Band-tailed Pigeon	April 18	Skinner Butte	DA,et al.	About a month later than normal.
Black Swift	May 9	Delta Ponds	JC	Rare, but normal migration window.
Black Swift (3)	May 26	Siltcoos River mouth	DF,AK	More common on the coast.
Vaux's Swift	April 14	Skinner Butte	BG	A week later than normal.
Vaux's Swift (7000)	May 11	Agate Hall – UO	DL	A normal migration time.
Calliope Hummingbird	April 18	SW Eugene	S&SG	First of 11 reports, but not as many as last year.
Lewis's Woodpecker	April 22	Skinner Butte	BG	Rare during spring migration.
Acorn Woodpecker (2)	April 23	Skinner Butte	JC	Rare at this location.
Red-naped Sapsucker (2)	April 22	Skinner Butte	S&SG	Quite rare during spring migration.
Olive-sided Flycatcher	April 26	Skinner Butte	RR	A few days earlier than normal.
Western Wood-pewee	May 7	River Rd area	BC	A few days later than normal.
Willow Flycatcher	May 18	Willow Creek	TM	A few days later than normal.
Hammond's Flycatcher	April 17	Mt. Pisgah area	TM	Right on schedule.
Gray Flycatcher	May 1	Skinner Butte	RR,DA	Rare in the county – a little over 10 records.
Dusky Flycatcher	April 28	Eugene area	MN	About a week later than normal.
Pacific-slope Flycatcher	April 22	Skinner Butte	BG	Right on schedule.
Say's Phoebe	April 7	Siltcoos River mouth	DF	Unusually late.
Say's Phoebe	April 25	East Springfield	GG	Extremely late.
Western Kingbird	April 17	FRR dam	MN	A few days later than normal.
Western Kingbird	May 19	Siuslaw River	DF	Rare on the coast.
Loggerhead Shrike	May 7	SJSR	SM,SH	Rarely found at the coast.
Cassin's Vireo	April 15	Crow Rd	RR	About a week later than normal.
Warbling Vireo	April 21	South Hills, Eugene	BC	Right on schedule.
Blue Jay	April 25	Marcola	DSt	Returned after the fall.

LARKS to GROSBEAKS

Horned Lark (2)	April 1	FRR – E. Coyote Unit	RR	An area where they've been found during the
Lark (9)	April 8	FRR – E. Coyote Unit	RR	Horned breeding season before.
Purple Martin	April 15	FRR	RR	A few days later than normal.
Northern Rough-winged Swallow	April 7	Delta Ponds	BG	A few days later than normal.
Northern Rough-winged Swallow	May 2	Mt. Pisgah	LM,et al.	Nest building.
Cliff Swallow	April 4	FRR	MN	About a week later than normal.
Barn Swallow	April 7	Golden Gardens	VT	About a week later than normal.
House Wren	April 28	Skinner Butte	TMe	About a week later than normal.
Swainson's Thrush	May 2	Clearwater Park	RR	Right on schedule.
Northern Mockingbird	April 16	Alvadore	DB	Last report for the winter.

Snow Bunting	May 20	SJSR	JC	Rare spring record.
Nashville Warbler	April 18	Skinner Butte	DA,et al.	A few days later than normal.
Yellow Warbler	April 22	Skinner Butte	S&SG	About a week earlier than normal.
Black-throated Gray Warbler	April 5	North Eugene	BG	Right on schedule.
Hermit Warbler	April 18	Skinner Butte	AP	A few days earlier than normal.
Cerulean Warbler	April 28	SE Eugene	FM	A first Oregon record if accepted by OBRC.
MacGillivray's Warbler	April 25	Mt. Pisgah area	LM,et al.	A few days later than normal.
Common Yellowthroat	April 3	SW of Eugene	BN	A few days later than normal.
Wilson's Warbler	April 18	Skinner Butte	DA,et al.	About a week later than normal.
Yellow-breasted Chat	May 6	FRR – E. Coyote Unit	LG	Right on schedule.
Chipping Sparrow	April 8	FRR – Zumwalt Park	RR	About a week later than normal.
Brewer's Sparrow	May 12	Heceta Head	NS	First Lane Co coast record.
Vesper Sparrow	May 15	FRR – Royal Ave	RR	About a month later than normal.
Lark Sparrow	May 29	McKenzie Bridge area	MN	Rare, but almost annual.
Grasshopper Sparrow	May 15	FRR – Royal Ave	RR	A few days later than normal.
Fox Sparrow	May 4	W downtown Eugene	EC	Last report for the winter.
White-throated Sparrow	April 27	SE Eugene	AM	Last report for the winter.
Golden-crowned Sparrow	May 25	SE Eugene	AM	Last report for the winter.
Western Tanager	April 21	Skinner Butte	TMe	Right on schedule.
Rose-breasted Grosbeak	May 28	FRR area	TG	Rare, but almost annual.
Black-headed Grosbeak	April 25	Marcola	DSt	Right on schedule.
Lazuli Bunting	April 23	Skinner Butte	TM,JC	About a week earlier than normal.
Yellow-headed Blackbird	April 5	FRR	RR	Right on schedule.
Brown-headed Cowbird	April 5	FRR	RR	A few days earlier than normal.
Bullock's Oriole	April 23	Skinner Butte	TM	A couple days earlier than normal.
Evening Grosbeak (100's)	April 9	Clearwater Park	RR	About a week later than normal.

From Our President: Life is Short Continues (*continued from page 1*)

and then juveniles. The fall shorebird migration is more leisurely than spring migration, and the birds might stay in an area for a time to feed and gain strength. It seems like a great chance to not only enjoy the ambience of the Oregon coast but to hone my shorebird ID skills for not-often-seen birds like Golden Plover, Lesser Yellowlegs, and any variety of sandpiper. I also enjoy seeing the easier to identify Black Oystercatcher, American Avocet, and Killdeer, but they are birds I do not see unless I go out looking for them!

I get busy in my day-to-day activities and do not always make time for the things I enjoy. A chance to hike and picnic in the mountains or on the coast would be a welcome change. Some of these outdoor experiences are so transient and special that if we let them come and go without appreciating them, we have to wait a full year for it to happen again. Who knows what can happen in a year's time? Life is short and time is precious.

Check us out on Facebook

Lane Audubon is now on Facebook! Please join our page and stay informed about events, bird walks, news, and conservation issues. Share bird sightings, photos, links, events, nature news and stories.

A message from Lane Audubon Board of Directors

Maeve Sowles, President

541.343.8664

president@laneaudubon.org

We ask you to become a local member of Lane County Audubon Society and support our grassroots efforts in the local community. All of your local dues stay here to help us work on local education projects and conservation issues related to birds and their habitats. With your support, we will continue to do the things you expect from us. We welcome your suggestions—this is your Audubon!

Kris Kirkeby

541.349.2439

k2kirk@comcast.net

Emu. Bald Eagle. Great Frigatebird. Sandhill Crane. Doris Bakshi likes big birds, even though she has had her run-ins with aggressive Emus and Canada Geese. She says wild turkeys hitting the roof sound like basketballs but she appreciates the small birds, too, with a passion for hummingbirds.

Doris is the person who helps LCAS handle membership renewal notifications. If your membership has lapsed (say it isn't so), she'll send you a card. And if you have already received your free three-month trial subscription to *The Quail*, you'll get a card that begins "A little birdie told me ..."

She has been doing this for three or four years. She says it's really a team effort. Tim Godsil runs the membership data report and prints the labels, Ron Renschler brings the supplies, and then Doris prepares the cards, sending them flying out in the mail. This job is done on a quarterly basis and involves preparing about 400 cards.

Doris has lived in Eugene about 11 years now. She grew up on a farm in southern Indiana and got interested in nature because her dad, who was involved in the lumber industry, had her memorize all the names for trees. When the family moved to town she struck out on hikes in the town's hills. She always enjoyed birds but thinks the gift of Bushnell binoculars from her children cemented the love.

Her first sighting of a Bald Eagle was in the San Juan Islands when she was the only one with binoculars, which rotated through many hands that day. She has been bird-watching in 48 of the 50 states and has kept a bird list for as long as she has been looking for birds.

She worked at the LCAS education booth when she first moved to town and says it was fun because it was a great way to meet interesting people. Now she encourages new people to the area to volunteer for booth staffing. Most of the questions are about identifying birds, but the booth has several field guides there to help. The booth offers people handouts and information sheets, and if a question can't be answered, volunteers record it along with contact information so someone can follow up later with the answer.

Although Doris is a long-time bird-watcher, she didn't become an Audubon member until she moved here. She became active pretty quickly, working with Rick Arhens' Christmas Bird Count group her first year in town. She ended up on television that evening when a TV crew followed them around. For seven or eight years she helped serve the traditional chili dinner that concludes that event. Now she does a Backyard Bird Count each year and finds it an amazing experience.

Some health problems have meant Doris can't work the booth or do much fieldwork now, but in the spirit of volunteerism she asked if she could help out while at home. She began doing membership renewal notification soon thereafter. We appreciate Doris's willingness to help and thank her for her contributions over the years.

Bald Eagle by Cary Kerst

Treats for the Winged and Walking

Kris Kirkeby

541.349.2439

k2kirk@comcast.net

Joyce Baker remembers her delight at age ten in discovering that if she threw seeds out on the snow outside her home in Sedro-Woolley, Washington, birds would come! Now, many years later, LCAS program attendees delight in discovering the bakery spread Joyce provides us with each month.

Life is full of irony. I asked her how she stayed so thin when she baked so well and she said she doesn't have sweet things in her house because sugar disturbs her sleep! Her loss is definitely our gain, so to speak!

Audubon volunteers find their niche by interesting routes. Joyce said she had been at a program meeting when Maeve Sowles, LCAS's ever hard-working president, came in after a hard day's work carrying a package of fig newtons. Joyce decided that one way she could help was to provide the pre-meeting treats. Nothing against fig newtons, but her baked goods far surpass our expectations every month!

Her love of baking began when Joyce was raising her two children. She always had fun with creative approaches to animal-shaped pancakes and birthday cakes. She likes using different recipes and used to bring coffee cakes to the meetings. However, her cupcakes have been the latest trend, and she provides an ongoing delight of toppings and combinations.

Her two young grandchildren, ages 3 and 5, visit her often. Since she doesn't have a cookie jar in her home, she is proud to report that their first request is for her to get down the binoculars. While the bird-loving gene hasn't yet expressed itself strongly in her granddaughters, she is proud of the way they describe her as "knowing all about birds." They frequently come to her with bird-related questions.

Joyce moved to Eugene in 1970 and in the late 1980s became involved with Audubon, going on a birding trip to the Malheur Field Station led by Dan Gleason. Joyce describes herself as an avid backyard birder, designing her garden to draw in birds. She has a bubbling rock that serves as an Anna's Hummingbird bath. One of her favorite birding experiences was last summer when she donned black slacks, yellow shirt, and red bandana to work outside. She was shocked to look up and see a similarly clad friend land near the water, a Western Tanager!

Joyce enjoys what she calls her "pods" — her Tai Chi friends, the Audubon group — and likes sharing a variety of common interests. She particularly enjoys the reports of bird sightings at our monthly program. Since Joyce is a therapist by trade, I asked her what she thought watching birds brings to people. She says looking out at a yard with birds at her office has a calming effect on her clients. They may be in the middle of a troubling conversation and see a bird fly by. She says she can see the tension momentarily release as they ask, "What was that bird?"

Joyce likes Abraham Maslow's description of "peak experiences" or high points in life. She feels that people are fortunate when they can feel thrill and awe when watching a bird. She thinks these moments are peak experiences for most of us. Her insight reminds us that we need to take the time to enjoy these moments of peace and joy!

by Cary Kerst

Wings and Wine Festival 2012

The seventh annual Wings and Wine Festival was held on May 12 under beautiful blue skies, for the first time ever! We had help from many volunteers and want to let them know how much we appreciate their help and support in this community outreach for Lane Audubon.

Meadowlark Prairie

Explore the West Eugene with your family

FMI: 541.338.7047, info@wewetlands.org

Cascades Raptor Center Greeters Needed

Cascades Raptor Center, Eugene

Like helping people and introducing them to the birds? Come be a greeter for Cascades Raptor Center (CRC)! If you would be willing to take a four-hour shift once a week to assist in CRC's gift shop and visitor center, please contact Louise at 541-485-1320, louise@eraptors.org.

Lane Audubon has received more than \$900 in donations as a memorial to Alice Dugan. We thank those who donated in her name; she inspired generosity and action in others.

Bird Walks and Events

**SATURDAY
July 21**

BIRDWATCHING BY CANOE

Dick Lamster will lead a birdwatching-by-canoe trip at Fern Ridge Lake. You will need to furnish your own canoe or kayak and lifejackets (required). Each craft will need an aquatic invasive species prevention permit (see www.boatoregon.com). To get more information and reserve a spot, call 541.343.8664. If you do not have a canoe, call anyway, as other participants may have extra space in their canoe.

**SATURDAY
August 18**

THIRD SATURDAY BIRD WALK

Location and Leader TBA

Check the LCAS website at <http://www.laneaudubon.org/birdwalk.htm> to learn more about the leader, location and start time. We will meet at the South Eugene High School parking lot (corner of 19th and Patterson) for carpooling. A \$3 donation is suggested. Please remember not to leave valuables in your car as a precaution.

Welcome and thank you to new volunteer Nancy Curran, who has volunteered to deliver *The Quail* to the post office and distribute extra copies to locations around town. THANKS to Nancy!
